

Examples of usage

- Increasing the temperature, heating or drying the inside of a drying furnace
- Removing water or drying after cleaning
- Drying or hardening attached electrical parts
- Preheating or drying coated parts
- Heating, sterilizing or unfreezing apparatus used for food preparation

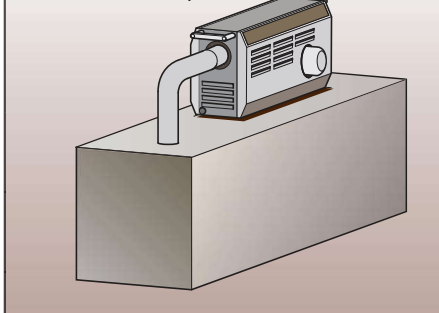

● Heat contraction of cap seal

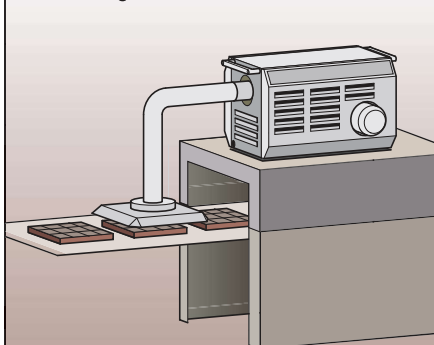

● Large-size garbage disposal equipment

● Secondary vulcanization cure of rubber-molded products

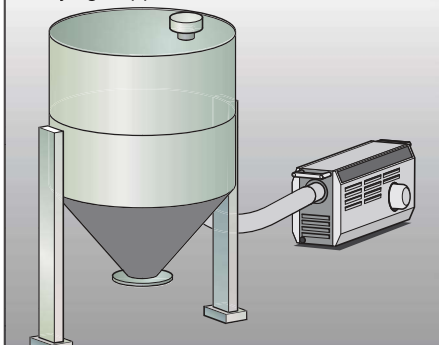

● Softening of chocolate surface

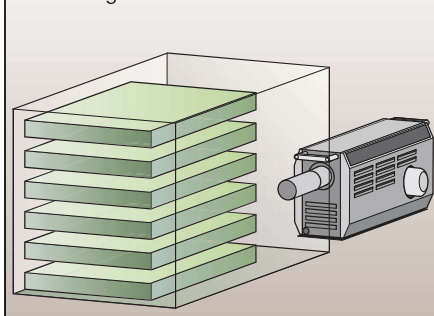

● Preheating engine of emergency helicopter

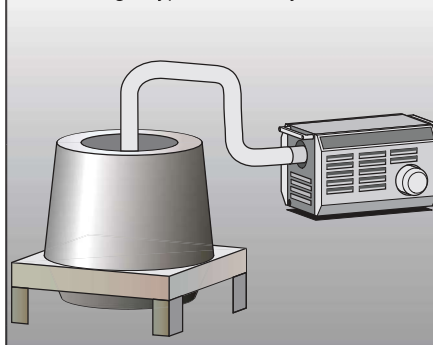

● Drying hopper

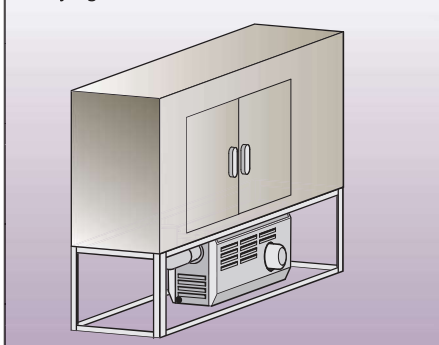

● Drying seed bed for propagating seedlings

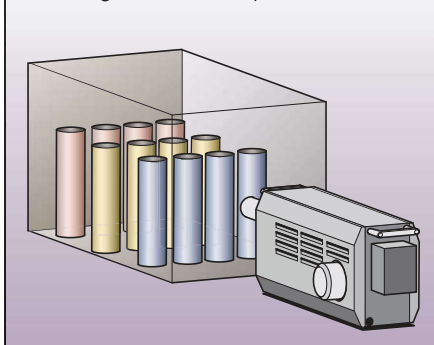

● Centrifugal-type hot air dryer

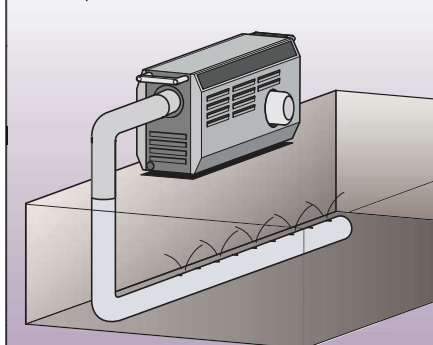

● Drying meat or fish

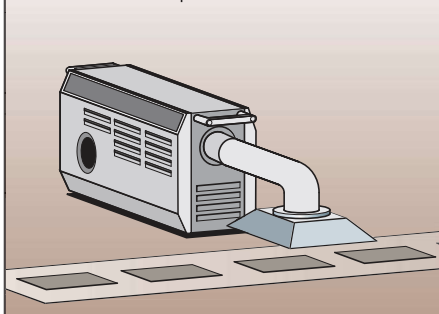

● Heating resin-molded products

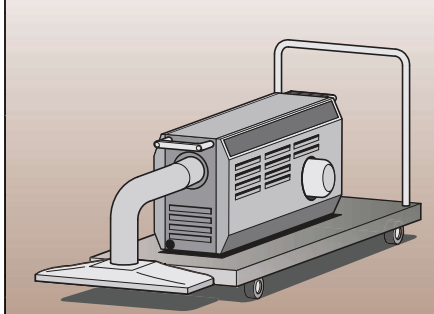

● Compost fermentation tank

● Heat treatment of circuit board for electronic components

● Snow-melting or unfreezing road surfaces

● Drying after washing
